

Important Information Regarding the December 2015 EMT Recertification

The New Jersey Department of Health is currently conducting critical system upgrades and maintenance on the www.njems.us site that is imperative to its functionality. Unfortunately, there is an implementation delay due to unanticipated technical issues.

As a result of this maintenance, application for EMTs due to recertify in December 2015, is currently unavailable. The Department will notify EMTs in the system via email and on the website when the application process is available.

Please note that a current certification for an active EMT, in good standing, will not be affected by this maintenance. The Department will advise all expiring EMTs if another procedure or process will need to commence to recertify, if the maintenance is not complete in the near future.

Please ensure that all of your information is current in the www.njems.us system to receive the most current information.
